

REDUCING LIGHT ENERGY CONSUMPTION IN PARKING AREAS

PROJECT 01

STYLIANI VLASSI - 1072792
ELIANNA POTOGLLOU - 1072682

DESCRIPTION

- Car drivers, equipped with the system's bluetooth tag, can book one of the customised parking spots in advance via the system's application.
- When they reach the designated spot, if the system recognises the tag, the light above the parking space will turn on to both affirm it's the right place but also let the driver park securely.
- The light will then stay on for 2 minutes, giving time to the driver to walk away safely
